

FOR IMMEDIATE RELEASE

TELEKENEX IXC ACQUIRES AUBETA NETWORKS

San Francisco, CA – March 27, 2009 – Telekenex IXC, today announced the acquisition of AuBeta Networks. With this transaction, an agreement was reached between AuBeta and Telekenex to acquire most of AuBeta's assets.

Telekenex is planning to hire the majority of AuBeta employees in the process to ensure consistency to the customer base. Telekenex is requiring AuBeta customers to extend their contractual term due to the contractual commitment Telekenex is required to make to AuBeta's underlying carriers.

The acquisition of AuBeta customers, as well as other recent telecom acquisitions, is an important part of Telekenex's strategy to expand market share and leverage its national private fiber network.

"Telekenex is happy to be able to help so many AuBeta customers keep their services up and running," Brandon Chaney, CEO of Telekenex, said. "In such a difficult economic environment, companies need to know they can rely on their critical vendors to support them. We are excited to be able to provide a smooth transition for all AuBeta customers willing to commit to us."

"We are pleased that Telekenex can offer our customers a complete business continuity solution that prevents any disruption," Ethan Hernandez, CEO of AuBeta Networks said. "Telekenex has the stability and operational infrastructure to provide our customers the level of service they require."
